Yes, there really is such a clinic! It is the international clinic union's VIRIBUS clinic.

The clinic works in such a way that only the actual costs are financed, i.e. not profit-oriented. The treating doctors are specialists in immunology, cellular biology and neurology. All doctors are also members of the Clinic Union's international research center and are therefore always up to date with the latest scientific developments. So you can speak of highly qualified doctors.

But why is the VIRIBUS clinic not interested in getting the best possible profits? All the doctors and the entire team behind it work out of ambition to help people, even if this seems to have gone out of fashion these days. They actually still exist, doctors who, regardless of interest groups, only focus on the well-being of the patient.

The VIRIBUS clinic was originally founded by four doctors who had previously been committed to neutral and independent treatments, beyond the dictated conventional medicine.

However, these doctors are not so-called alternative doctors, nor are they known as complimentary doctors, they are classic doctors with very extensive training, a high level of knowledge and many years of experience.

Most of today's so-called school doctors have unfortunately opted for a different, easier way, it is no longer about acquiring as much knowledge as possible in order to be able to achieve the best for the patient.

Today's school medical doctors are unfortunately in a system that leaves them no choice and are therefore forced to do justice to this system, even if this system is not able to treat diseases successfully.

The so-called conventional medicine is unfortunately part of a so-called health system, which describes itself as a health industry, even as an industry with high growth rates. Of course, a system whose interest is based on profit cannot be expected to focus on the patient and his recovery, quite the contrary.

The VIRIBUS clinic works outside of this system and the high treatment success of over 90% shows the right way. A quote from Prof. Dr. L. Dayeng could not be more appropriate in this case: "In order to pay full attention to sick people and have the absolute will to help them, a healthcare facility must be free of commerce, otherwise it can not function."

There is nothing to add.
Where is the VIRIBUS clinic located and why is it there?

Our clinic is located on an island, far away from industry, bad air, toxic tap water, chemically contaminated food, etc. in the south-east Pacific in the south of the Philippines. There is a reason for this, because successful treatment requires the strict separation of all negative impacts and the Philippines have no industry, the air is so pure that no dust is formed, and the very healthy drinking water comes directly from a source. The food and meals contain all the important nutrients and are of course chemical-free because they are grown in-Farm. Freshly caught fish, fresh meat, freshly squeezed and strong fruit juices for an optimal healthy diet.

It is not without reason that our island is called the green island of life. You can find lots of facts and presentations, reports from former patients, advice, tips on maintaining health and more on our website: viribus-klinik.com

The medicinal plants used, which are mainly found only in Southeast Asia, are so strong that the organism regenerates in the shortest possible time, which is the prerequisite for successful treatment.

Our clinic has received many awards for its successful treatments, the ambience and the service around the treatment. Patients from many countries with a wide variety of diseases come to our clinic. Cancer, allergies, MS and other neuronal damage, vaccine damage, asthma, rheumatic diseases, cardiovascular diseases, skin diseases and other autoimmune diseases are successfully treated.

Decide for health and life, in Europe and all other industrial regions you will not get well, we know from experience.

The team at the VIRIBUS clinic will be happy to treat you.
